3. Go to the "My library" tab and click on the "Watched"/"Queue" button

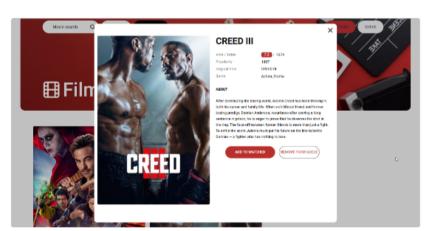

Learn more

5. Click on the first film

Actual result:

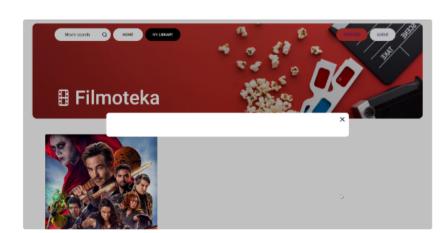

The modal window shows information about the second film

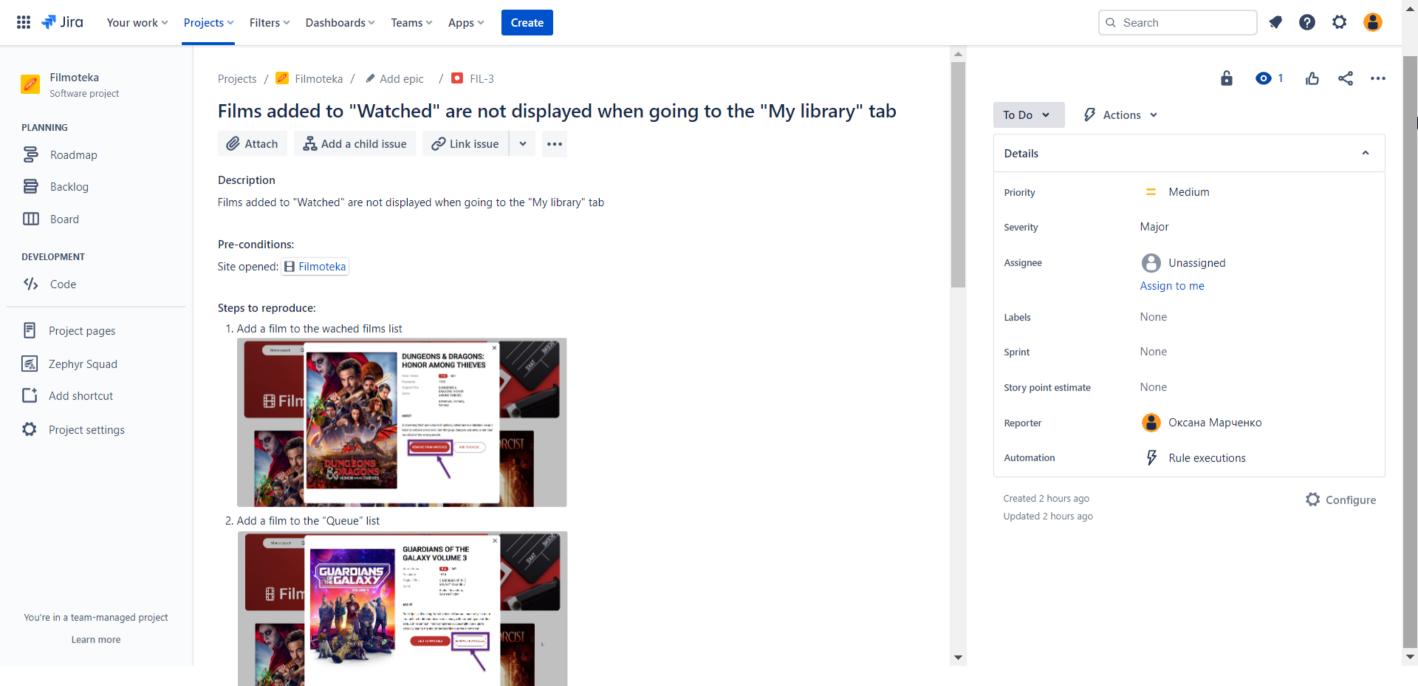

Expected result:

The modal window shows information about first film.

In addition, if I remove the second film from the watched films list (from the queue), the modal window won't open for the first film

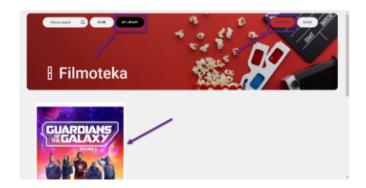

Environment

3. Go to the "My library" tab

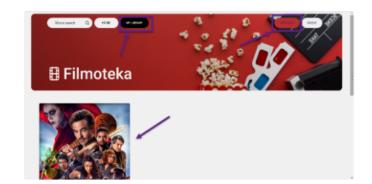

Actual result: • Unsaved changes

The "Wached" button is active (lights up red). But the page displays information about the film from the "Queue" list.

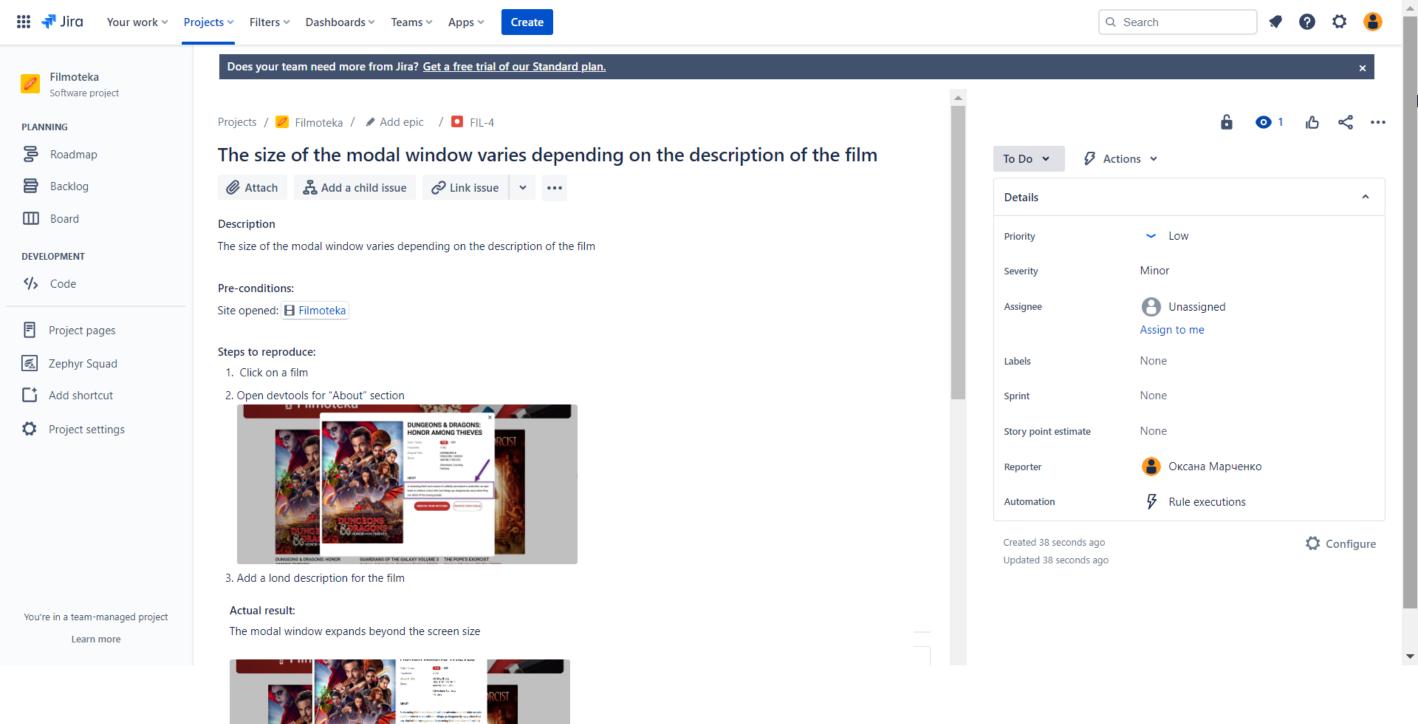

Expected result:

The "Wached" button is active (lights up red). The page displays information about the film from the "Watched" list.

Environment

Google Chrom Version 110.0.5481.178

Expected result:

If the description of the movie is very long, a scroll appears in the modal window to scroll through the information. The size of the modal window does not change

Environment • Unsaved changes

Google Chrom Version 110.0.5481.178
